CENTRIFUGAL, SINGLE STAGE, METALLIC PUMPS ACCORDING TO ISO 2858 - 5199. MECHANICAL SEAL CHAMBER ACCORDING TO UNI 3069

CN SEAL-M Series

The stuffing box dimension allows the interchangeability between standard mechanical seals and packing. The standard construction uses mechanical seal according to DIN.

Possiblity to insert many different kind of mechanical seal. Standard mechanical seal flushing with internal recirculation from pressure side to seal chamber.

Available different kind of flushing line like in an execution similar to API 682 standard.

PUMP DETAILS

Pump casings

Robust casings, according to ISO 2858 available as standard in CF8M stainless steel, Optimized hydraulics with high efficiency. Low vibration levels for a smooth running.

Nozzles

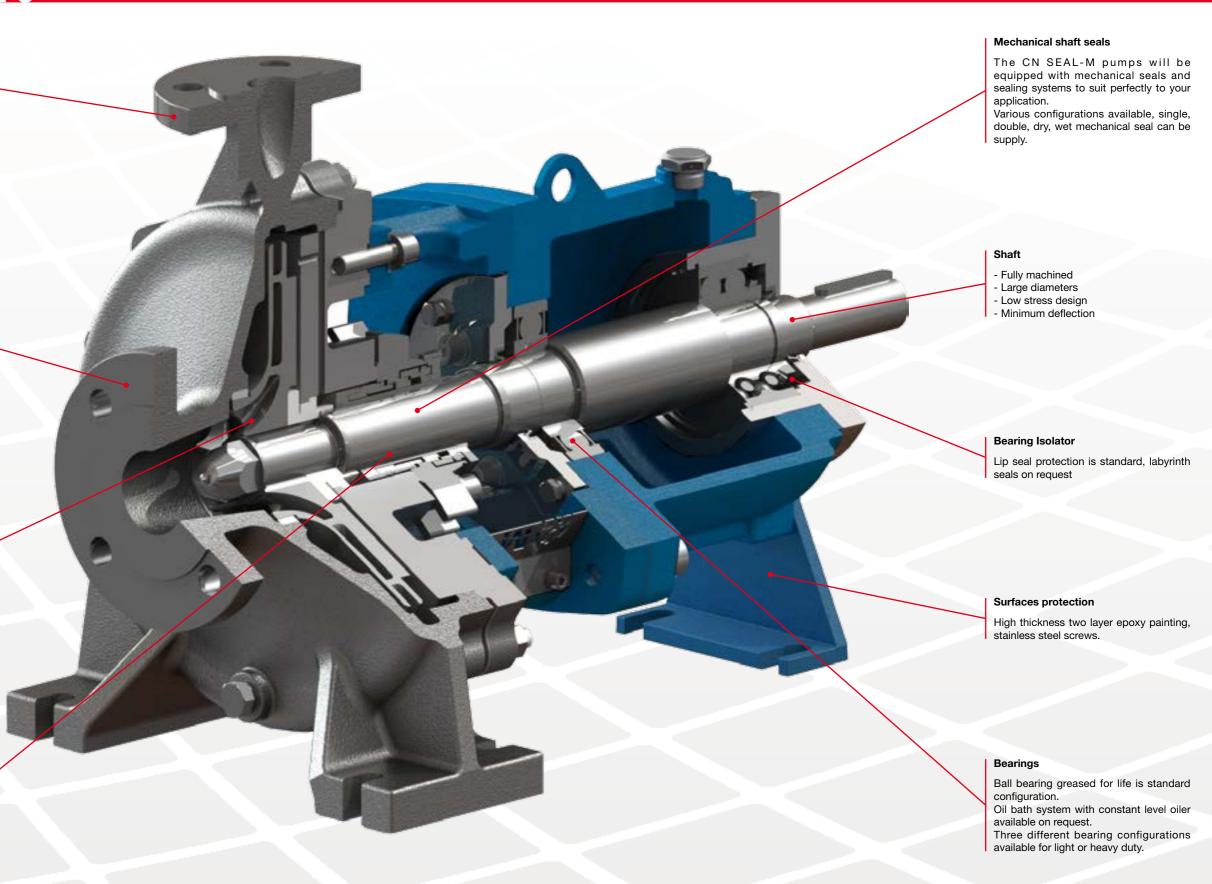

Suction and discharge connections are flanged CLASS 150 RF or DIN PN16.

Impeller

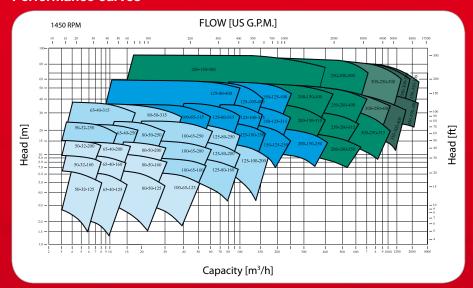

Multiple closed impellers for most casings to meet specific hydraulic requirements. Balanced according to requirements of ISO 1940, Grade 2.5.

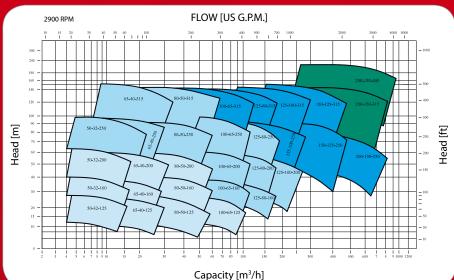

Pump Shaft

Strongly sized shaft acc. to ISO 5199 ensure extremely low deflexion and long life of mechanical seal.

Performance curves

CN SEAL-M Design Metallic mechanically sealed single stage centrifugal pump. Dimensions and delivery data to ISO/EN 2858/5199 Framemounted. ATEX 94/9/EG.

Connections: Flange rating per ANSI B16.5 Class 150, DIN PN 16

Operating ranges

- Flow: 0.1-1000 m3/h
- Head: up to 225 m (740 ft)
- Temperature range: -30°C (-22°F) to 200°C (+390°F);
- System pressure: max. 16 bar (290 psi)
- Capability of handling solids depending on share, shape, hardness: consult factory

Manufactured by:

A unit of Mischiatti GROUP
